

	<b>A 410</b>	<b>A 4SUB</b>
<b>System</b>	2 Way Closed	Electronic Subwoofer w/passive radiator woofer
<b>Woofer , Tweeter (in/mm)</b>	3¾/95 , 1/25	8/203 + 8/203 passive radiator
<b>Power (W) long/short term</b>	50/70	-
<b>Amplifier Rated Output (W)</b>	-	100
<b>Frequency Range (Hz)</b>	120 - 20.000	40-200
<b>Impedance (Ohm)</b>	6	22 k
<b>Dimensions HxWxD/mm</b>	221 x 110 x 85	325 x 600 x 154
<b>Dimensions HxWxD/inches</b>	8.7 x 4.33 x 3.35	12.8 x 23.6 x 6.1
<b>Finish</b>	Silver	Stone Grey

## Jamo A 4 Series

INNOVATION AND FUNCTION

A 410PDD | T3, UK  
(A 410, A 4SUB) "EXCELLENT" ★★★★★

### THE ENGINEERS' FAVOURITE DETAILS

#### Subwoofer configuration

Subwoofers normally have bass reflex ports to extend the bass. However, the flat, compact A 4SUB features a passive radiator that is incorporated in the design, totally eliminating port noise. The powerful 8" long-throw woofer and the passive radiator are both on the rear baffle of the subwoofer – thus firing into the wall or floor and further reinforcing bass reproduction.

#### Two-way system, A 410

Despite the small size of the satellite speaker it features a two-way system – a woofer and a tweeter - that reproduces the mid and upper range frequencies with full fidelity. The result is a very natural sounding vocal quality.

#### Low-cut X-over

Just as small organ pipes cannot play deep bass, small speakers find it difficult to reach the lowest notes. Instead of overloading small speakers with bass signals that are beyond their ability to reproduce, the low-cut bass filter prevents the deepest bass from reaching the speakers. This protects the loudspeaker

against overload, while also enabling a cleaner, more detailed reproduction of midrange and treble frequencies

#### Electronic overload protection

The electronic PTC resistor limits power to the loudspeaker if it becomes overloaded. When the volume is turned down again, the resistor cools down and the sound is restored to its normal level.

#### Design

The lean, curvaceous and compact design of the A 410 harmonizes with the adjustable bracket which allows placement almost anywhere – on a bookshelf, on a wall, in a corner or even on the ceiling.

Since bass frequencies are not directional, a subwoofer can be placed almost anywhere. The A 4SUB's design opens up a world of positioning possibilities: standing or lying on the floor, hanging on the wall or hidden underneath a sofa.

#### Accessories

ST A 410 – The ST A 410 stand is designed especially for the A 410. Cable management is achieved in an elegant fashion by using an attractive silver-shielded cable to supply the audio signal to the speaker and simultaneously stabilize the aluminium profile.
