#### Jamo A 70 CEN

The A 70 CEN offers a distinct and sophisticated design yet blends seamlessly with most home interiors.

The use of a coaxial drive unit (tweeter integrated in the mid/bass unit) ensures the same acoustic centre of the two drivers and thus the treble and bass frequencies reach your ears in correct acoustic phase (simultaneously). To further improve the sonic qualities (reduce

unwanted vibrations) the drivers are not only firmly attached to the front baffle but also clamped to the rear part of the cabinet.

In order to aim the center speaker towards your ears – if mounted above or below the listening height - the mounting bracket allows quick and easy adjustment in three different angles.

#### Specifications

System	2 ½-way closed
Woofer (mm/in)	2 x 90 / 3.5
Tweeter (mm/in)	19 / ¾ Dome
Sensitivity (dB - 2,8V / 1m)	86
Impedance (Ohms)	6
Weight (kg/lbs)	3 / 6.6
Dimensions (HxWxD/mm/in)	114 x 551 x 93 / 4.5 x 21.7 x 3.7
Frequency Range	100-20,000
Power (Long Term/Short Term)	100W / 140W
Finish	Brushed Aluminum
