

Fire-Rated Back Box – FRB6, FRB6.5 and FRB8.5

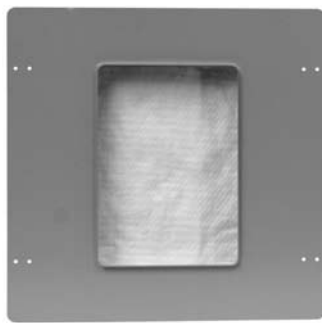

The Jamo fire rated back boxes are designed to fit most Jamo in-ceiling speakers with 6.5-inch or 8-inch woofers and in-wall speakers with 6.5 inch woofers. See appropriate models below.

The fire rated back box allows installers to meet building codes as well as diminish the undesirable transfer of sound from one room to the other. Each back box comes with a standard conduit connector. Pre-drilled holes simplify the installation process.

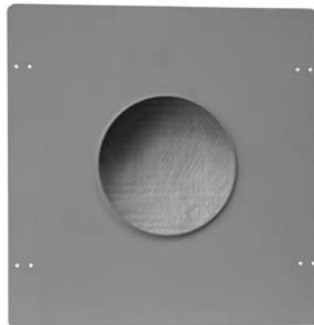

All models exceed the one-hour fire-rating specifications and meet UL2043 requirements for installation in plenum spaces. This device has also been tested to meet UL 263, ASTM E119-98, NFPA 251, UBC 7-1 and ULC CAN/ULC-S101 - M89 standards.
