

# JAMO 360 SERIES • S 25 HCS

## Specifications

System	2-Way
Recommended Amp Power	Up to 100W per channel
Impedance	8 Ohm nominal
Sensitivity (dB @ 2.8V/1m)	82dB
Frequency Response	120Hz - 25kHz
Crossover	2.3KHz
Tweeter [mm / in]	19 / .75
Dimensions [in]	5.25" x 3.75" x 3.75"
Enclosure Material	ABS Plastic
Finishes	Black or White

## Design

Drawing inspiration from nature, the Jamo 360 boasts organic curvaceous shapes that produce immersive and vivid sound in all directions, creating both a visual and acoustic statement in your home or commercial space.

In the 360 S 25 HCS configuration, high-gloss spherical shells encompasses the tweeters and woofers of five S 25 speakers in a welcoming open design, creating the ideal structure for luscious 360 degree sound. The aluminum-polypropylene woofers of the S 25 speakers are neatly surrounded by a high-quality metallic trim, developing an eye-catching visual contrast.

Polished aluminum posts connect the S 25 speakers' shells to a brushed aluminum alloy base that keeps these specimens of Danish design firmly rooted to a flat surface.

Thoughtfully crafted, these speakers can be easily mounted on a wall, granting you the ultimate in flexibility and producing a wide and lifelike soundstage. Installing the speakers is quite simple, as the S 25 speakers have a pair of screw-down connectors on the rear of each speaker.

The Jamo 360 Series' distinctive Danish design makes these speakers a show-stopping conversation piece at your next dinner party and represents a true statement on modern acoustic and visual taste.

## Technology

By utilizing Jamo's exclusive Omnipolar® acoustic dispersion technology, the 360 Series provides a unique and immersive listening experience. This is based on the principle that sound should be omnidirectional rather than directional with a narrowed focus, providing consistent frequency and time response throughout the room, so every spot is the "sweet spot."

Traditional speaker arrangements create a narrow field of sound which grants those sitting directly in the middle of the speakers a superior listening experience. With the 360 Series, you can stand practically anywhere in the room and enjoy vivid and immersive sound.

The 360 S 25 HCS boasts a bevy of high-quality performance features including:

- Omnipolar® technology which allows for totally immersive sound everywhere in the room
- Aluminum dome neodymium tweeters
- Aluminum-polypropylene hybrid dome woofers

Despite their diminutive size, the Jamo 360 Series is perfect for larger rooms. Pairing the S 25 satellites together creates a wide front soundstage and an alluring immersive surround effect.

**You won't believe it until you hear it.**

**The 360 Series is Global Sonic Immersion.**
